6. Your One Health Activities/Initiatives

(Symposiums, Summits, Workshops, Discussion Series, etc)

1. Swampy Science: Rats in Post-Katrina New Orleans

- a. The One Health Club in partnership with Swampy Science hosted a talk from Bruno Gherzi, a veterinarian and current PhD student in the Tulane Department of Ecology and Evolutionary Biology. Dr. Gherzi spoke about One Health, his research, and unique applications of One Health to New Orleans. Many students and non-students from the community attended, and the talk was followed by a social hour to further discuss concept of One Health and how it's relevance to New Orleans.

7. Brief History of Your Organization's One Health Involvement

[The One Health Club at Tulane](#) was founded in January 2017 by students from Tulane's [School of Medicine](#), [School of Public Health and Tropical Medicine](#), and the [Department of Ecology and Evolutionary Biology](#) interested in incorporating a broader approach to health into their studies of human medicine, public health, environmental sciences, natural resources, and research with the goal of promoting interdisciplinary efforts between these seemingly disparate fields. The club holds events throughout the year to engage Tulane students and the broader New Orleans-community in learning about One Health and its applications.
