Reading News

- Scientific Basis of the November 18 Online One Health Education Initiative
- The One Health Commission (OHC) organized the One Health Education Task Force (DHET) in 2015. The One Health Education (OHE) team was initially composed of Dr. George Lushington, PhD, a leading education consultant who was asked to write a plan for the task force, the task to be completed in cooperation with the OHC and the One Health Education Task Force. The plan was to be completed by the end of 2015. The plan was to be completed by the end of 2015. The plan was to be completed by the end of 2015.

One Health Announcement!

Happy Halloween!

A time when Bats may more often cross our minds and paths.

Bat Rabies Education in the Americas

The One Health Commission for Public Health Education Team (OHC-PHET) is conducting a nationwide bat rabies education campaign for Halloween. This is a time when bat rabies education is most needed. Bat rabies education is most needed in the Americas and utilization of these educational resources is the most important to public health education. We are requesting that you promote the use of bat rabies education materials to your students, colleagues, and the general public. We are requesting that you promote the use of bat rabies education materials to your students, colleagues, and the general public. One Health Announcement!

Calling all Pet Owners in the U.S.!!

National Pet Health Survey

Healthy Pets, Healthy People

Companion animals can have a direct medical effect on the health and well-being of owners and families. This can be the important context of environmental conditions and public health of our people. The One Health Commission is administering a voluntary survey to gather information from pet owners to evaluate health trends and disparities in the US.

Editorial Comment

This issue of the December 2017 One Health Happenings got going that we had to break it into two segments to avoid confusion.
